Objective

I have a true passion for creating beautiful and intuitive web experiences. I excel at consulting and communicating with business stakeholders as well as leading development teams. The time has never been better for brands to create rich digital media experiences.

Experience

Creative Developer / **Deutsch LA**
May 2015 - PRESENT, Los Angeles, California

- Served as member of front-end development project teams creating responsive, performant user interfaces for Volkwagen web properties, including:

    - VW.com Build Your Own - Mobile (vw.com/builder)

    - VW Car-Net (vwcarnetconnect.com)

    - VW Reward Card (vwrewardcard.com)

- Managed code deployments to multiple integration servers for QA testing using virtualization, automation scripting, Jenkins, and SVN.

- Participated in working group sessions researching next generation architecture requirements and features, including test-driven development environments, continuous deployment/continuous integration, and automated regression testing
